

# TODAY, PROCESSING POWER IS FIREPOWER.

AT LOCKHEED MARTIN,  
WE'RE ENGINEERING A BETTER TOMORROW.®

While it's true that the F-35 is the world's most advanced fighter, it's a lot more than just that. It's also a flying supercomputer that can perform 400 billion operations per second while remaining undetected by enemy forces. Combine that with unmatched sensor fusion and interoperability and the F-35 doesn't just ensure air dominance, it changes the entire equation. After all, engineering a more secure tomorrow is the first step to making it a better one.
