
PPG INDUSTRIES (SINGAPORE) PTE LTD

PPG's aerospace business offers a comprehensive range of innovative products and services for original equipment manufacturers and aftermarket customers in commercial, regional, military, and business aviation.

We are committed to providing customers with breakthrough technology, quality, availability, sales, and service. Our network of Application Support Centers (ASCs) is conveniently located to offer global capability from a regional base to expedite delivery of our products and bring technical resources closer to our customers.

Aerospace Coatings

We offer a complete line of aircraft coatings, from primers for a variety of airframe substrates to topcoats in solid, metallic and special effect mica colors. Product lines include DESOTO® and DEFT™ brand coatings. Recent innovations include DESOTHANE™ HD basecoat/clearcoat system, Desothane HD SR Solar reflective coatings, DESOPRIME™ CF chrome-free wash primer, and AEROCRON® electrocoat primer.

PPG also offers high performance pretreatments, adhesion promoters, solvent cleaners, polishes and waxes.

Aerospace Sealants

PRC™ and Pro-Seal™ high-performance sealants seal the structures of many of the world's aircraft. Our comprehensive range of sealants includes products for fuel tanks, protecting aircraft mating surfaces, and sealing aircraft windshields. ASCs provide SEMKIT™ packages, premixed and frozen sealant, and innovative Customized Sealant Solutions such as PRC SEALCAP™ and precision parts manufactured through PPG's proprietary Ambient Reactive Extrusion technology that offer time and labor savings with quality advantages.

Aerospace Transparencies

PPG provides aircraft windshields and windows for

commercial, regional, military and general aviation. Advanced technology solutions for customers include PPG WinLogic® intelligent window systems, windows with SOLARON Blue Protection™ UV+ blocking technology, and OPTICOR™ advanced transparency material. These technologies improve aircrew safety and increase transparency reliability and service life.

Transparent Armor & Specialty Products

Securitect™ Transparent Armor and PPG Specialty Transparencies, for use in vehicles, ships, rail, and buildings, are designed and tested to provide enhanced protection against a multitude of impact, ballistic, and blast threats.

Chemical Management Services

PPG offers a turnkey outsourcing program for chemical and fluid management, process management and logistics - custom designed to include sourcing, purchasing, and vendor management.

Aerospace Packaging

We offer SEMCO™ packaging & application systems that are intended to store, mix, dispense, apply and remove specialty chemicals used in manufacturing and repair environments for many industries. PPG also offers chemical packaging services, with decades of experience down-packaging specialty chemicals for aerospace, electronics, and general industrial applications from bulk formats to custom sizes.

Engineered Materials

Our Cuming Microwave specialty coatings and materials absorb microwaves and radio waves. Our DEXMET™ highly engineered, expanded and perforated metal foils are used in critical applications, including aircraft lightning strike protection.
