

Since its inception in 2008, JTC's Seletar Aerospace Park (SAP) has become the leading hub for aerospace activities for the Asia Pacific region.

Spanning 320 hectares, SAP is home to over 80 multi-national and local aerospace companies, with more than 6,000 aerospace professionals engaged in key aerospace business activities and functions such as:

- Manufacturing and assembly of aircraft components;
- Maintenance, Repair and Overhaul (MRO);
- Business and general aviation; and
- Training and R&D activities

SAP exemplifies excellence through its offering of world-class infrastructure and dynamic ecosystem. It not only provides firms with ready-to-use space solutions for sustainable growth but also fosters a collaborative setting that sparks innovative ideas. JTC collaborates with industry partners such as the Association of Aerospace Industries (Singapore) to deliver programmes and workshops for the aerospace sector. For instance, the Aerospace Open Innovation Challenge launched in collaboration with Enterprise Singapore in 2024 connects aerospace companies with challenge statements in areas of sustainability, productivity and digitalisation, to crowdsource innovative solutions from start-ups and SMEs. The Challenge concluded with a demo day, where successfully matched start-ups showcased their solutions to the industry. This not only helps address industry demand and global aerospace challenges, start-ups and SMEs can also leverage such partnerships to build their track record.

Visit www.jtc.gov.sg/sap for more information on Seletar Aerospace Park.

JTC Aviation One and Two

These multi-tenanted industrial buildings offer a variety of spaces that cater to the needs of aviation-related companies. Industrial units range from 50 to 1,500 sqm, while office spaces range from 50 to 500 sqm.

JTC aeroSpace Three and Four

Aerospace firms can establish operations with ease with JTC's "plug-and-play" infrastructure solutions. aeroSpace Three features nine ready-built facilities, designed with high floor loading specifications and adequate ceiling heights for MRO and manufacturing activities. The upcoming aeroSpace Four will be the first standard factory at SAP to include green infrastructure solutions, including EV charging infrastructure, and more green spaces for the community to enjoy.

The Oval

Designed to bring communities together, The Oval is a delight for the senses. Conserved colonial bungalows that dot the enclave house unique F&B and lifestyle options, while outdoor spaces provide picturesque spots to relax and unwind. Want to connect with nature? Then take a short walk to the Hampstead Wetlands Park, where lush greenery is woven into the fabric of everyday life.
