

# CHROMALLOY (THAILAND) LTD.

---

Chromalloy is the leading global provider of gas path PMAs and advanced repairs for gas turbine engines. For over 70 years, we have been making safe flight and energy generation more economical. We are the only independent company with end-to-end airfoil manufacturing capabilities, including design, development, casting, coating, and machining.

Chromalloy's competitive advantages have been built over decades, equipping us to specialize in critical, high-value engine parts. As the only independent provider of FAA-approved PMA parts and DER repairs for the hot section of aerospace engines, we provide options where there once were none—and savings that make a difference for your bottom line. Our vertically integrated capabilities and deep product expertise enable us to provide a full suite of proprietary, cost-advantaged solutions for aerospace engines.

Our value extends beyond cost reduction. Chromalloy's LifeX® solutions safely & reliably extend the life of aircraft engines and industrial and aeroderivative turbines. Our innovative advanced repairs increase the yield of critical engine parts, meaning fewer parts

to replace and savings on each shop visit. If replacement is required, our FAA-certified PMA parts provide further value.

Chromalloy is different from other solutions providers who just focus on one piece of the aftermarket puzzle. Chromalloy's new product pipeline remains active, and we are continuously looking for ways to bring value to the industry and our customers. We partner with customers to understand their reliability, cost, and material challenges. Chromalloy engineers and scientists develop and improve processes, technologies, materials at state-of-the-art facilities. Chromalloy leverages these advancements into high-quality, reliable LifeX PMA parts, advanced repairs, and services. Chromalloy's commitment to innovation and service provides increasing value to our customers and strengthens the Chromalloy-Customer partnership.

With operations across the globe, the headquarters for Chromalloy's industry-changing advancements is the ECOE, located in Palm Beach Gardens, Florida. Chromalloy Thailand's component repair expertise is focused on LPC, HPC, LPT blades, vanes, honeycomb seal and combustion chamber components.
