

## SELETAR AEROSPACE PARK

Since its establishment in 2008, JTC's Seletar Aerospace Park (SAP) has evolved into the Asia Pacific region's leading hub for aerospace activities.

Spanning 320 hectares, SAP is home to over 80 multinational and local aerospace companies, employing more than 6,000 aerospace professionals across key sectors, including:

- Aircraft component manufacturing and assembly
- Maintenance, Repair and Overhaul (MRO) services
- Business and general aviation
- Training and Research and Development (R&D) activities

SAP exemplifies excellence not only for its world-class infrastructure but also for its dynamic ecosystem that fosters innovation and sustainable growth. SAP offers ready-to-use space solutions designed to support businesses at every stage, while cultivating a collaborative environment that sparks creative ideas and solutions.

As part of JTC's **Industry Connect** initiatives, JTC collaborates with industry partners such as the **Association of Aerospace Industries Singapore (AAIS)** to deliver impactful programs and workshops for the aerospace sector. One notable initiative is the **Aerospace Open Innovation Challenge (AOIC)**, launched in 2024 in partnership with **Enterprise Singapore** and AAIS. This challenge connects aerospace companies with problem statements in areas such as sustainability, productivity and digitalisation, inviting start-ups and SMEs to offer innovative solutions.

In addition, JTC hosts the **JTC-AAIS Sustainability Community of Practice (COP)**, which serves as a platform for the aerospace community to share best practices on sustainability initiatives. These sessions bring industry leaders together to discuss critical topics like waste management, energy efficiency, and carbon accounting, promoting collaboration and driving sustainable progress across the sector.

### JTC Aviation One and Two

These multi-tenanted industrial buildings provide a range of spaces to meet the needs of aviation-related companies. Industrial units vary in size from 50 to 1,500 sqm, while office spaces range from 50 to 500 sqm.

### JTC aeroSpace Three and Four

Aerospace companies can easily establish their operations with JTC's "plug-and-play" infrastructure solutions. aeroSpace Three offers nine ready-built facilities, each designed with high floor loading specifications and ample ceiling heights to support MRO and manufacturing activities. The upcoming aeroSpace Four will be the first standard factory at SAP to feature green infrastructure solutions, including EV charging stations and enhanced green spaces for the community to enjoy.

### The Oval

Designed to foster community connections, The Oval features conserved colonial bungalows that house distinctive F&B and lifestyle options. Outdoor spaces provide picturesque spots to relax and unwind. For a peaceful escape, take a short stroll to Hampstead Wetlands Park, where lush greenery is seamlessly integrated into daily life, embodying the concept of an Industry in Nature.
