Mr. Yue Keng Mun
Head, Aviation Research Centre

Situated in Tampines next to the idyllic Bedok Reservoir, Temasek Polytechnic is a leading institution of higher learning in Singapore. Established in April 1990, we take pride in equipping our students with lifelong skills and digital knowledge for a future of dynamic change. Currently TP has 6 academic schools, more than 13,000 full-time students, 36 full-time diploma courses and more than 40 part-time courses. A key player in the national drive for lifelong learning, TP offers numerous opportunities for adult learners to reskill and upskill with industry-relevant programmes.

On board with Singapore's Smart Nation strategy, TP actively promotes digital business strategies, R&D and partnering initiatives in emerging areas such as Industry 4.0 and AI. We also continue to forge strategic partnerships to broaden our network and improve our core industry competencies.

The Aviation Research Centre is at the forefront of applied research in unmanned aircraft, with the capability to develop industrial drones such as tethered power systems, fuel-cell drone and specialized drone systems. As a UATO, TP provides unmanned aircraft training for Class A Rotorcraft and conducts practical assessments, proficiency checks, and lifting of limitations leading to an unmanned aircraft pilot license (UAPL). TP is also active in conducting training in drone aerial mapping overseas and operating small UAVs.
